

In the Claims:

Please amend claims 16 and 17 as follows:

1-15. Canceled

5067  
C'  
16. (Currently Amended) A method of making a magnetic disk,  
comprising the steps of:

coating a disk surface with a lubricating layer comprising molecules having a  
photocrosslinking functional group;

causing a crosslinking in said molecules by applying an optical radiation to said  
lubricating layer;

wherein said step of causing said crosslinking is conducted by applying a  
substantially monochromatic far-ultraviolet radiation with a wavelength corresponding to an  
absorption wavelength of said photocrosslinking functional group as said optical radiation.

17. (Currently Amended) A method as claimed in claim 16, wherein  
~~said step of causing said crosslinking is conducted by applying a substantially~~  
~~monochromatic far-ultraviolet radiation having~~ has ~~a half-height width of 15nm or less as~~  
~~said optical radiation.~~

Sub  
Cl 7

18. (Original) A method as claimed in claim 16, wherein said photocrosslinking functional group is selected from the group consisting of: an alkenyl group, an alkenyl halide group, an aryl halide group, an aryl azide group, piperonyl group and epoxy group.

B2

19. (Original) A method as claimed in claim 16, wherein said step of causing said crosslinking is conducted while applying heat to said lubricating layer.

20-29. Canceled
